

## **Public-Private Partnership (PPP) projects in New Jersey**

- **New Jersey Wind Port**

Announced in 2020, this is the nation's first purpose-built offshore wind port. Located in Salem County, it serves as a hub for staging, assembly, and manufacturing activities related to offshore wind projects along the East Coast. The port is expected to create up to 1,500 manufacturing, assembly, and operations jobs, along with hundreds of construction jobs.

- **Leading Light Offshore Wind Project**

Approved in early 2024, this project is a collaboration between Invenergy and energyRe. Situated approximately 40 miles east of Long Beach Island, it boasts a capacity of 2,400 MW and plans to install up to 100 offshore wind turbines. Offshore construction is slated to begin in 2028, with full operation by 2031.

- **Attentive Energy 2 Offshore Wind Project**

Also approved in 2024, this project is a partnership between TotalEnergies and Corio Generation. Located over 40 miles off the coast of Seaside Heights, it has a capacity of 1,342 MW and aims to power approximately 600,000 homes upon its expected operational date in 2032.

- **Port Authority of New York and New Jersey Initiatives**

The Port Authority has engaged in various PPP projects to enhance infrastructure, including the redevelopment of the George Washington Bridge and the Lincoln Tunnel entrance. These projects involve collaborations with private entities to improve critical transportation links between New Jersey and New York.
